Objective

Results-driven **PHP Laravel Developer** with **3+ years of experience** in designing, developing, and maintaining scalable web applications, RESTful APIs, admin panels, eCommerce platforms, and multi-role management systems. Strong expertise in **Laravel, PHP, MySQL, MVC architecture, REST API development, RBAC, payment gateway integration, OTP authentication, GST/KYC API integration, caching, and database optimization**.

Experienced in delivering business-focused digital solutions for eCommerce, healthcare, CMS, laundry management, construction, and mobile application platforms. Skilled in collaborating with clients, understanding business requirements, debugging production issues, and delivering secure, high-performance backend solutions.

Skills

- **Backend Development:** PHP, Laravel, MVC Architecture, RESTful APIs
- **Frontend Technologies:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax
- **Database:** MySQL, Eloquent ORM, Database Design, Query Optimization
- **Authentication & Security:** RBAC, Multi-role Authentication, OTP Login, Validation
- **API & Integrations:** Payment Gateway, GST API, KYC API, Third-party API Integration
- **Tools & Version Control:** Git, Bitbucket
- **Other Skills:** Caching, Performance Optimization, Admin Panel Development, Client Communication, Project Coordination

Professional Experience

PHP Laravel Developer

Mar 2023 - Present

[Risians Technology Pvt Ltd , C-II/203, New Ashok Nagar, New Delhi -110096](#)

- Developed and maintained scalable Laravel-based web applications, admin panels, and mobile application APIs.
- Designed and implemented secure RESTful APIs for eCommerce, healthcare, CMS, multi-vendor, and multi-store platforms.
- Built multi-role authentication systems for Admin, Seller, Distributor, Retailer, Staff, and User roles.
- Implemented Role-Based Access Control using Laravel middleware, guards, and permission-based workflows.
- Integrated payment gateways, OTP authentication, GST APIs, KYC APIs, and third-party APIs.
- Optimized application performance using database indexing, query optimization, caching, and code refactoring.

- Created dynamic admin dashboards for product management, order management, user management, and reporting.
- Debugged and resolved complex production issues across multiple active client projects.
- Collaborated directly with clients to gather requirements, explain technical solutions, and deliver customized features.
- Worked closely with frontend and mobile teams to ensure smooth API integration and deployment.

Business Development Executive

Aug 2022 – Jan 2023

[Sizh Solution Pvt Ltd , D-52, D Block, Sector 2, Noida, UttarPradesh, Pin code-201301](#)

- Coordinated with clients and development teams for project requirement analysis.
- Managed online bidding platforms including Upwork, Freelancer, and Fiverr.
- Supported project planning, documentation, and delivery tracking.
- Assisted in communication between clients and technical teams for smooth project execution.
- Gained practical exposure to web application workflows and client-facing project management.

Key Projects

- [Kash Quiz App - Android/iOS Application](#)
 - Developed user authentication APIs and quiz management APIs.
 - Created admin panel modules for quiz, category, user, and result management.
 - Implemented caching to improve API response performance.
 - Integrated third-party APIs for mobile app functionality.
 - Supported API integration with Android and iOS applications.
- [Rivix E-Commerce Website and Application](#)
 - Developed REST APIs for mobile applications and web-based eCommerce features.
 - Designed seller dashboard modules for product and order management.
 - Implemented coupon management, state-wise pricing, and secure payment gateway integration.
 - Optimized backend performance for product listing, cart, checkout, and order workflows.
- [AgroOrbit E-commerce Website and Application](#)
 - Developed admin management system for products, users, websites, and business verification.
 - Implemented OTP-based login and multi-role authentication for Super Admin, Admin, Retailer, Seller, Distributor, and User.
 - Integrated GST and KYC APIs for business validation.
 - Built negotiation features for single and bulk orders.
 - Developed coupon creation modules including flat and product-wise discounts.
 - Implemented state-wise pricing and optimized application performance.

- **Onelt Website and Application**
 - Designed and developed admin panel for product management and KYC verification.
 - Implemented OTP login, multi-role authentication, coupon systems, and state-wise pricing.
 - Developed negotiation features for single and bulk product quantities.
 - Customized user-specific website functionality based on business roles.
 - Improved backend performance and application usability.
- **Fabspin – Multi-Store Laundry Management System (Web and Application)**
 - Built centralized admin panel for multi-store laundry operations.
 - Designed order lifecycle APIs covering pickup, processing, delivery, and completion stages.
 - Implemented RBAC for Admin, Store, Staff, and Customer roles.
 - Developed real-time order tracking features and reporting dashboards.
 - Automated business reporting for daily operations and store performance.
- **Mr Blue – Multi-Store Laundry Management System (Web and Application)**
 - Developed multi-role web-based admin management system for laundry store operations.
 - Built features for order tracking, staff management, store management, and centralized administration.
 - Created backend modules to manage customers, orders, services, pricing, and delivery workflows.
 - Improved operational visibility through dashboard-based tracking.
- **Heal Sudan - Case Management Platform**
 - **Created a dynamic form builder with text fields, dropdowns, checkboxes, conditional logic, and customization options.**
 - **Developed case registration and case tracking modules with statuses such as Pending, In Progress, and Closed.**
 - **Implemented automated email/SMS alerts for case updates, reminders, hearings, and deadlines.**
 - **Enabled CSV/Excel data export and report generation based on case type and status.**
- **Truemed Healthcare Platform**
 - **Developed appointment booking functionality for doctors and diagnostic centers.**
 - **Implemented real-time scheduling and automated reminders via SMS/email.**
 - **Built doctor profile modules including qualifications, specialties, ratings, and reviews.**
 - **Supported healthcare workflow modules through Laravel backend development.**
- **SEH - Equine Healthcare Website**
 - Developed a resource-based website for horse accessories and healthcare information.
 - Integrated consultation booking functionality for specialized equine doctors.
 - Created detailed doctor and healthcare professional profiles.
 - Added profile details including qualifications, specialties, and patient reviews.
- **Zikhara Solutions - Construction Solutions Website**
 - Developed a website for construction accessories, equipment, and business information.
 - Created admin modules to manage website content and multiple dynamic forms.

- Implemented conditional logic to show or hide form fields based on previous responses.
- Built backend workflows for admin-controlled content and form management.
- **Acero Building Systems - CMS Website**
 - Built content approval workflow allowing staff to propose updates reviewed by admins.
 - Implemented notifications for approval and rejection statuses.
 - Designed role-based access control for staff, reviewers, and admins.
 - Ensured secure data handling and responsive functionality for web and mobile users.
- **DPT - Subscription Management Platform**
 - Developed subscription management modules with flexible plans.
 - Implemented automated email/SMS notifications for plan expirations and renewals.
 - Integrated secure payment gateway functionality.
 - Built user-friendly subscription management interfaces.
- **Linkage Global Resourcing - eCommerce/Admin Platform**
 - **Built admin systems for product and website management.**
 - **Created seller panel access controlled by verification status.**
 - **Implemented OTP login, role-based authentication, and customized user workflows.**
 - **Improved backend performance for seller and admin operations.**
- **Mortgage Market - UAE Mortgage Broker & Financial Platform**
 - **Developed and maintained Laravel backend modules for a UAE-based mortgage and financial broker platform.**
 - **Implemented website/admin functionality for mortgage products, eligibility workflows, enquiry handling, and content management.**
 - **Supported calculator-based user journeys including mortgage eligibility, buyout, and mortgage payment calculations.**
 - **Improved backend reliability, form handling, and data flow for lead generation and customer enquiry processes.**

Education

- **MBA (Information Technology & Finance)** – Galgotias Institute of Management and Technology (2020–2022)
- **BCA (Computer Applications)** – C.S.J.M. University, Kanpur (2016–2019)
